Domain 2: Education & Learning [CO4/CO5]

A2: Plagiarism-Aware Student Essay Coach

Problem Statement:

Students submit essays without understanding how to improve writing quality or avoid unintentional plagiarism. Build a GenAI writing coach that accepts a student essay, provides structured feedback across clarity, argument, evidence, and grammar, flags potentially plagiarised phrases, suggests paraphrased alternatives, and generates an improved draft.

Expected Deliverables:

- Essay upload interface (PDF/text)
- Structured feedback report across 4 writing dimensions
- Phrase-level plagiarism risk detection with alternatives
- Improved essay draft generation
- Before-and-after comparison view

Suggested Tech Stack:

LLM API, LangChain, Streamlit, PyPDF2, difflib

Datasets Available:

- **PAN Plagiarism Corpus 2011** — 27,000+ document pairs with annotated source- plagiarism relationships (webis.de/research/corpora/webis-pan-pc-11.html)
- **ASAP Essay Scoring Dataset** — 12,978 student essays across 8 prompts with human quality scores (kaggle.com/competitions/asap-aes)
- **Persuade Corpus 2.0** — 25,996 argumentative essays by US students with quality annotations (kaggle.com/competitions/feedback-prize-english-language-learning)

- **C3 Chinese Machine Reading Comprehension** — Alternate multilingual essay dataset useful for cross-lingual writing tasks (huggingface.co/datasets/c3)
